

False Indigo

Mature Height: 10-15'

Sandy & loamy soils, tolerates drought. Full sun to partial shade. Flowers appear April to June. Zone: 4-9

Red Osier Dogwood

Mature Height: 6-10'

Tolerant of dry but prefers wet. Full sun to light shade. Flowers in May to early June. Red stem in winter. Zone: 2-7

American Hazelnut (Filbert)

Mature Height: 8-12'

Does best on well-drained loams. Prefers full sun for best growth. Tolerates part shade but lowers fruit production. Zone: 4-9

Redbud

Mature Height: 25-35'

Moist, well-drained soil but adaptable except for permanently wet. Full sun to part shade. Flowers in March to May. Zone: 4-9

American Plum

Mature Height: 20-30'

Moist soils. winter-hardy, little tolerance for shade, drought, fire. White flowers in Spring. Zone: 3-8

Highbush Cranberry

Mature Height: 6-15'

Moist areas, can survive dryer, sunny areas. White flowers, fruit persists throughout winter. Fruits can be eaten raw or cooked. Zone: 2-7

Red Maple

Mature Height: 75-80'

Adaptable to wide range of soil conditions. Autumn foliage varies, greenish yellow, scarlet to burgundy. Shade tree. Zone: 3-9

Swamp White Oak

Mature Height: 50-60'

Partial shade to full sun. Likes swampy, acidic soil. Drought tolerant. Copper and red leaves in fall. Zone: 4-8

Sugar Maple

Mature Height: 75-100'

Cold resistant. Red and yellow leaves in fall. Sap used for maple syrup. Zone: 3-8

Black Walnut

Mature Height: 70-100'

Self pollinating. Wide range of soils. Likes full sun. Fruit falls in October.

Zone: 4-9

Red Oak

Mature Height: 50-70'

Prefers slightly acidic soil but is drought tolerant. Likes loamy, moist, sandy, well drained and clay soils.

Zone: 4-9

White Spruce

Mature Height: 75'

Best in well-drained, sandy soils, prefers acidic soils and cooler climates, likes full sun.

Zone: 2-7

Pawpaw

Mature Height: 15-30'

Moist, slightly acidic soils, with regular watering but adaptable. Prefers full sun to part shade. Trees are not self pollinating. Requires cross pollination. Fall fruit.

Zone: 4-8

Norway Spruce

Mature Height: 125'

Very cold hardy and tolerates acidic soils well. Prefers cooler climates, full sun.

Zone: 2-7

White Cedar (Arborvitae)

Mature Height: 40-50'

Likes limestone soils, moist, boggy areas. Tolerant of acidic and alkaline soils. Adaptable and tolerant once established, full sun.

Zone: 3-7

Persimmon

Mature Height: 35-40'

Prefers moist, well-drained soil often found growing in sandy, infertile soils, full sun. Requires pollination. Fall fruit.

Zone: 4-9

White Pine

Mature Height: 75-100'

Likes moist, sandy soils but grows well on variety of soil types. Likes clay soils better than most.

Zone: 3-8
